Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1, 2, 12-15, 25-28, and 38-40, drawn to obtaining, recording, storing, and selling behavior data about a series of human behavior, classified in class 705, subclass 10.
 - II. Claims 3-7, 16-20, and 29-33, drawn to processing data in which information concerning at least place information and information about the place, provided to a user, are described according to a prescribed specification, wherein facilities register facility data, based upon a calculated fee, so that the place information may be generated, classified in class 705, subclass 10.
 - III. Claims 8-11, 21-24, and 34-37, drawn to obtaining a location or route of a user, providing information depending on the obtained location and route, and charging for the provided information, and judging the relationship between the data and an actual location or route of the user, classified in class 705, subclass 10.
2. The inventions are distinct, each from the other because of the following reasons:

Inventions I, II, and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has

separate utility such as obtaining, recording, and analyzing behavior data about a series of human behavior, wherein the data may be sold and used independently of any additional analysis, as disclosed by the invention. In the instant case, invention II has separate utility such as processing data in which information concerning at least place information and information about the place, provided to a user, are described according to a prescribed specification. Further, facilities can register facility data, wherein place information (i.e., about the registered facility) may be generated. In the instant case, invention III has separate utility such as obtaining a location or route of a user, providing information depending on the obtained location and route, and charging for the provided information. Further, the relationship between the obtained data and an actual location or route of the user is determined. See MPEP § 806.05(d).

3. Because these inventions are distinct for the reasons given above and the search required for each Group (i.e., Groups I, II, and III) is not required for each of the other Groups, restriction for examination purposes as indicated is proper.
4. A telephone call was made to Richard Gollhofer on March 17, 2005 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Andre Boyce whose telephone number is (703) 305-1867. The examiner can normally be reached on 9:30-6pm M-F.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Tariq Hafiz can be reached on (703) 305-9643. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
